Ujjawal Raj

Full Stack Developer

Phone: +91-7254835139 | Email: rajpr8769@gmail.com | linkedin.com/in/ujjawal-raj20
github.com/Ujjawalraaj | Portfolio: **ujjawalraaj.github.io**

PROFESSIONAL SUMMARY

Full Stack Developer who shipped a **production personalization platform for Colorbar Cosmetics** (Modi Enterprises) — live at engraving.colorbarapps.com, serving real customers daily. Cut manual workflow time by approximately **80%** with zero errors since launch. Delivered the entire system end-to-end: Shopify storefront customization, React.js admin panel, and a secure Node.js REST API with TOTP two-factor authentication. Proficient in JavaScript, React.js, Node.js, Python, RESTful API design, debugging, and Agile development. **Portfolio:** ujjawalraaj.github.io

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, SQL, HTML5, CSS3 **Databases:** MySQL, MongoDB
Frontend: React.js 19, Tailwind CSS, Shopify Liquid, Responsive Design, DOM Manipulation
Backend: Node.js, Express.js, RESTful API Design, Django, Nodemailer (SMTP)
Auth & Security: TOTP 2FA (otpauth), JWT, bcryptjs, Rate Limiting, Role-Based Access Control, Helmet.js
Tools: Git, GitHub, Shopify Admin REST API, Postman, VS Code, npm, Vite, Chrome DevTools

PROFESSIONAL EXPERIENCE

Modicare Limited (Colorbar Cosmetics Division) Sep 2025 – Present
Full Stack Developer Intern *New Delhi, India (On-Site)*

Key Project: Colorbar Engraving Platform — Live in production

Shopify Storefront (Customer-Facing):

- Developed a live engraving preview engine serving **135+ product SKUs** — now used by every customer personalizing products on the storefront.
- Engineered an interactive engraving modal with live text rendering on product images, 3 font families, 11 custom motifs, and shade-variant-aware positioning.
- Modified cart drawer, full cart page, and checkout flow to display engraving details and lock personalized items to quantity of 1. Ensured cross-browser compatibility across Chrome, Safari, and Firefox.

React.js Admin Dashboard (5 Views, 11 Components):

- Created a comprehensive admin interface following Agile sprints, with instant order sync from Shopify API (30s polling), smart filtering logic, and automatic status tag updates.
- Designed pixel-perfect product visualization using ResizeObserver and CSS transforms with SKU-specific position configurations. Added XLSX export for bulk data.

Node.js/Express REST API (20+ Endpoints):

- Architected a secure API using OOP patterns for authentication, order management, customer data, user administration, and health monitoring.
- Implemented TOTP two-factor authentication with QR setup, 8 backup codes, 5-min pending tokens, 8-hour sessions, login rate limiting (10/15min per user+IP), and Helmet.js headers.
- Configured automated email notifications via Office 365 SMTP, sending styled HTML order details to the fulfillment team. Established role-based user management with password resets and 2FA admin.

Impact:

- Reduced manual order processing by approximately **80%** by replacing spreadsheet-based tracking with a purpose-built management tool.
- Achieved **zero engraving errors** since launch, replacing a previously manual and error-prone workflow.
- Integrated **6 systems** end-to-end: Shopify API, React dashboard, Node API, TOTP auth, email notifications, XLSX reporting.
- Enabled a **new premium revenue stream** through product personalization. Collaborated with infrastructure team for deployment and production monitoring.

PROJECTS

Portfolio Website ujjawalraaj.github.io HTML, CSS, JavaScript

- Crafted a performance-optimized portfolio scoring 95+ on Lighthouse — single RAF scroll loop, IntersectionObserver reveals, passive listeners, zero dependencies.

Online Assessment Platform GitHub Django, React.js, MySQL, DRF • Jun 2025 – Jul 2025

- Full-stack examination platform with JWT auth, role-based access, timed assessments, question randomization, and automated evaluation.

Driver Drowsiness Detection GitHub Python, OpenCV, dlib • Mar 2025 – Apr 2025

- Real-time computer vision system using facial landmark detection (EAR algorithm) to monitor driver fatigue and trigger safety alerts.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering Graduated: May 2025
DIT University, Dehradun

CERTIFICATIONS

- Introduction to Software Engineering – Coursera (IBM)
- Web Development Certification – System Tron (2024)
- AI/ML Internship Certification – System Tron (2024)
